

EEF Venues are committed to ensuring that all facilities and services offered by the venues are available to all visitors to the sites.

Where feasible, we aim to make adequate provisions for those clients that may require specialist assistance or equipment to enable them to enjoy the EEF Venues experience.

The organisation has empowered managers to research new technologies and products that would allow them to meet the requirements of those with specialist needs. These suggestions are reviewed at regular management meetings and implemented where necessary.

A staff-training programme has been introduced for all employees of Woodland Grange, aiding in the raising of awareness of our commitment and dedication to improvements throughout the site in regards to accessibility.

All areas of the site are continuously monitored for acceptability, from the companies Website to bedrooms, public areas and new constructions through client feedback and staff comments.

We also utilise external specialists to assess our compliance to the latest legislation.

Signed

David Vaughton
Venues Director
