
EEF, the Voice of Manufacturing, is helping thousands of companies to evolve and compete in a fast-changing world. We offer a range of consultancy, support and trainings services to businesses across the UK and internationally, including helping those that we work with to reduce their impact on the environment and remain in compliance with legislation through a range of environmental services.

By continuously improving our processes, the way we do business can have an increasingly positive effect on the environment. Specifically we will:

- Comply with or exceed applicable legal requirements and other requirements to which EEF subscribes which relate to its environmental activities,
- Prevent pollution and reduce waste from our activities through the development and operation of an environmental management system,
- Achieve continual improvement through the development of environmental performance evaluation procedures and through the setting of objectives, targets and management programmes in relation to our significant impacts,
- Minimize any significant adverse environmental impacts of new developments through the use of integrated environmental management procedures and planning, and
- Set an example of leadership in the field of environmental management.

I give my full backing to this policy and will support staff in putting it into practice.

Signed:

**T C Scuoler
